ADDITIONS

- I. Title: None.
- II. Specification: None.
- III. Claims

Add Claims 13 to 15.

13. An animal toy, including

- (a) a compressibly elastically deformable hollow thin-walled non-spherical rubber core sealingly circumscribing and enclosing a selected compressible gaseous volume and including a center, a non-spherical outer surface, a wall one-sixteenth to five-sixteenths of an inch thick, and points on the outer surface at varying distances from the center;
- (b) a cover affixed to said outer surface of said core, said cover comprising a firm woven cloth heavily napped and shrunk to produce a smooth resilient texture;
- (c) at least one elongate strip of material extending over said outer surface as a line of demarcation to separate said felt cover into at least two areas, one on either side of said strip of material.

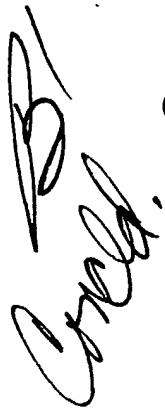

14. An animal toy, including

- (a) a compressibly elastically deformable hollow thin-walled non-spherical rubber core sealingly circumscribing and enclosing a selected compressible gaseous volume and including
- (i) a center,
 - (ii) a non-spherical outer surface,
 - (iii) a wall one-sixteenth to five-sixteenths of an inch thick,
 - (iv) points on the outer surface at varying distances from the center, and
 - (v) an inner wall portion circumscribing an aperture extending completely through said core;
- (b) a cover affixed to said outer surface of said core, said cover comprising a firm woven cloth heavily napped and shrunk to produce a smooth resilient texture.

15. An animal toy, including

- (a) a compressibly elastically deformable thin-walled hollow symmetrical non-spherical rubber core sealingly circumscribing and enclosing a selected

compressible gaseous volume and including

- 
- (i) a center,
 - (ii) a non-spherical outer surface,
 - (iii) a wall one-sixteenth to five-sixteenths of an inch thick,
 - (iv) points on the outer surface at varying distances from the center; and,
- (b) a cover affixed to said outer surface of said core, said cover comprising a firm woven cloth heavily napped and shrunk to form a smooth resilient texture, said symmetrical core being shaped and dimensioned such that the toy can be thrown to bounce
- (i) along a straight line, and
 - (ii) erratically such that the direction of travel of the toy changes from bounce to bounce due to the shape and dimension of the toy.
-

IV. Abstract: None.
